Subject:Announcement of a Website Cybersecurity Incident

To which item it meets--article 4 paragraph xx:26

Date of events:2026/09/18

Contents:

1.Date of occurrence of the event:2026/09/18

2.Cause of occurrence:

Abnormal login activities related to our website services were detected under routine monitoring. Subsequent investigation revealed that external attackers attempted website login on a large scale through the existing login mechanism.

3.Handling procedure:

Upon identification of the incident, we immediately activated incident response procedures. We also conducted a comprehensive review of system login records, blocked suspicious connections, and performed a full security assessment of the website's source code. At the time of this announcement, no further abnormal login activities using the same method have been detected, and all our website services continue to operate normally.

4.Anticipated possible loss or impact:

Based on our current assessment, the incident does not have any material impact on the business operations.

5.Amount of insurance claims that might be obtained:NA

6.Improvement status and future countermeasures:

(1) Strengthen website authentication, access control, and abnormal activity detection mechanisms.

(2) Enhance the Web Application Firewall (WAF) to reduce the likelihood of large-scale or abnormal login attempts.

(3) Engage cybersecurity experts to conduct a comprehensive review of the system architecture and information security protection mechanisms.

(4) Notify affected users and provide appropriate communication channels.

7.Any other matters that need to be specified:None
